Pest Management is an integrated approach to tackling a pest problem, which includes control (either physical or chemical) and prevention. The professional pest manager needs knowledge and skills, along with the latest reputed products and advanced modern equipment, in order to provide highly effective solution. Knowledge of local and international Regulatory, Hygiene & Safety Standards, PPE equipment and conforming to these, forms an integral part of every pest manager's responsibility.

High standard of pest control services shall be maintained by using ultramodern equipment and materials like the same as maintained at major Airports, 5-Star Hotels etc.

Safety and health is key when using various pesticides / other products. Ensure that the workers wear appropriate protective clothing, rubber gloves, face masks, follow the directions on the label of any product, follow the instructions of the qualified pest management skillfull technicians and ventilate the room when using strong chemicals. Use biocides safely. Always read the label and product information before use.

### **Pesticide Regulations in India**

The Insecticides Act, 1968 and Insecticides Rules, 1971 regulate the import, registration process, manufacture, sale, transport, distribution and use of insecticides (pesticides) with a

view to prevent risk to human beings or animals and for all connected matters, throughout India. All insecticides (pesticides) have to necessarily undergo the registration process with the Central Insecticides Board & Registration Committee (CIB & RC) before they can be made available for use or sale. Thus, technically all insecticides (pesticides) in India are those substances that are listed on the "Schedule" of the Insecticides Act, 1968. The Registration Certificate mandates that a label be put on the packaging, which clearly indicates the nature of the insecticide (Agricultural or Household use), composition, active ingredient, target pest(s), recommended dosage, caution sign and safety precautions. Therefore, a pesticide labelled for agriculture should not be used in a household.

#### **Materials:**

All the pesticides, insecticides, rodent repellents, other required materials and equipment will be provided by the contractor.

The CIB & RC scrutinizes and periodically reviews all pesticides and their usage - some are banned from registration itself. Sometimes a pesticide can be banned even after registration when it causes serious environmental and public health concerns. Some pesticides are meant for "Restricted Use" which means that they can be used only for prescribed purposes and by authorized personnel by obtaining the appropriate Government license.

#### **Manpower:**

The contractor must ensure that the minimum trained manpower shall be deputed to the captioned work and is qualified and experienced in pest control service (technician). Duty shall be for six days a week in normal duty or shift duty as per the Bank's requirement. The duties of technician deputed by contractor shall be at the discretion of Bank's Engineer-in-Charge. However, in case of exigencies, the contractor shall provide services beyond above mentioned hours / holiday. Contractor shall attend to all emergency works prior to or after shift hours. All the pest control services as tabulated below shall be provided using this manpower and additional manpower, if any. No extra cost shall be paid for additional manpower for these services. The qualification of deployed manpower shall be as under:

**Trained pest control service technician:** The technician typically need a high school diploma and receive on-the-job training. State laws require pest control workers to be licensed with minimum 3 years post qualification experience in similar field of pest control services for large office / commercial high-rise Buildings / Industrial set-up.
